

# WE ONLY USE RENEWABLE DIESEL

Reducing energy demand and efficient use of energy should be the prime focus of any energy project, but as a next step the fuel chosen to meet residual energy demand should be *green, clean* and *safe*. Our renewable diesel is just that.

## GREEN, CLEAN AND SAFE

Fuel is predominantly waste-derived

Lifecycle greenhouse gas emissions reduced by up to 90%

Lower NOx, fine particulate and CO emissions

Odourless and free from sulphur and metals

## SUPERIOR PERFORMANCE

Better fuel combustion and improved fuel efficiency

Superior cold-weather performance

Endorsed by wide range of manufacturers

Can be mixed with red diesel

## WHAT ELSE ARE WE DOING FOR OUR PLANET?

Caring for the planet is at the heart of our business. Call us to discuss our environmental policies, projects and low/ zero carbon products, including battery store tower lights, location mats and recycling pods
